EDUCATION

Arizona State University, Ira A. Fulton Schools of Engineering | Tempe, AZ

Expected Graduation December 2024

*Bachelor of Science in **Computer Science***

Cumulative GPA: 4.15/4.0

Honors and Awards: NAMU's Scholarship (\$56,000), Devils Invent: Land, Air and Sea (Hackathon) - 3rd Prize Winner (\$500)

EXPERIENCE

Oryza Systems

May 2023 – Jul 2023

Software Engineer Intern

- Constructed a Video Management System (VMS) using Qt C++ to enable real-time monitoring of IP cameras, review of video recordings, and intelligent video analysis by implementing video and image processing AI models
- Upgraded the VMS to support 32 simultaneous camera streams, up from 1 stream, using OpenCV, FFmpeg, and C++ multi-threading techniques. Optimized performance enabling image processing on basic hardware with no external GPU needed
- Analyzed and integrated UI features from open-source Nx-Meta to the project, enhancing user interface and experience
- Collaborated with 5 other engineers to develop RESTful APIs for login, and data management based on the CRUD principle. Implemented real-time intelligent video analysis using WebSocket connections for data transfer between server and client.

PROJECTS

Instagram Database Clone

Oct 2023 – Nov 2023

- Engineered a robust Instagram Clone Database in MySQL, and designed a normalized schema to model intricate relationships between users, posts, comments, likes, and followers; implemented advanced SQL features including JOINS, subqueries, and aggregate functions for complex data retrieval and manipulation.
- Focused on database optimization and security, utilizing indexing for improved query performance and implementing secure authentication methods to ensure data integrity and safeguard user information

YelpCamp (Fullstack app built with MERN stack) (bit.ly/binh-yelpcamp)

Jun 2023 – Aug 2023

- Developed a dynamic full-stack web application, YelpCamp, leveraging cutting-edge technologies such as Node.js, Express.js, MongoDB, Bootstrap and JavaScript. App implemented CRUD functionality and Model-view-controller design pattern.
- Implemented user authentication and authorization with Passport.js. Designed to avoid common security attacks such as Mongo injection or Cross-site scripting. Utilized Sessions to establish secure login system and ensure seamless user experience
- Created a database schema to store campground information, user details, and user reviews using MongoDB and Mongoose
- Integrated the Mapbox API to enhance the application by providing interactive campground maps

Youtube Clone (<https://yt-web-client-gq7klg4nva-uc.a.run.app/>)

Jun 2023 – Jul 2023

- Engineered a YouTube clone leveraging TypeScript, Next.js, Express.js Adopted a Dockerized deployment strategy.
- Implemented FFmpeg for efficient video compression, paired with Firebase Functions to manage uploads. Optimized storage with Google Cloud Storage, ensuring swift retrieval and playback, while Google Cloud Pub/Sub was harnessed to trigger events
- Incorporated Firebase Firestore for robust web hosting and utilized Firebase Auth for secure Google account authentication

My Portfolio Website (<https://ezngbi.github.io/personal-portfolio/>)

May 2023 – Jun 2023

- Developed a responsive portfolio website with React and implemented advanced animations using CSS and React Bootstrap
- Utilized React components and state management techniques to ensure a modular and maintainable codebase

OTHER EXPERIENCES

Arizona State University

Aug 2023 - Present

Undergraduate Teaching Assistant – CSE 230

- Assisted professor in concepts like assembly language, instruction sets, registers, memory operations, exception handling, and processor organization and design.
- Assessed students' assembly code assignments, checking for optimal use of registers and memory and offered targeted feedback on students mistakes. Guided students through the intricacies of debugging in assembly language.

Arizona State University

Jul 2022 - Present

Resident Assistant

- Organized 10 events and worked with a team of 40 RAs to foster community and build relationships among dorm residents
- Managed and mentored 60 first-year students, ensuring their well-being and enforcing campus policies
